

I CLAIM:

1. A wireless router device comprising:
 - a processor unit,
 - a wireless transmission circuit coupled to said processor unit,5 for transmitting wireless signals to and from said processor unit, and for communicating with various network systems,
 - a 3G transmission circuit coupled to said processor unit, for transmitting 3G signals to and from said processor unit, and for communicating with 3G systems,10 a network device coupled to said processor unit, for communicating said processor unit with end users,
 - said wireless transmission circuit and said 3G transmission circuit and said network device being communicatable with each other via said processor unit, to allow end users to couple and share 15 information from the network systems and the 3G systems.
2. The wireless router device as claimed in claim 1 further comprising a first antenna coupled to said wireless transmission circuit, and a second antenna coupled to said 3G transmission circuit for communicating said processor unit with the network 20 systems and the 3G systems.
3. The wireless router device as claimed in claim 1, wherein said network device includes a plurality of couplers for communicating with various end users.
4. The wireless router device as claimed in claim 1 further 25 comprising a second network device coupled to said processor unit, for communicating said processor unit with various network systems.
